

Air Diffuser - CVA Series

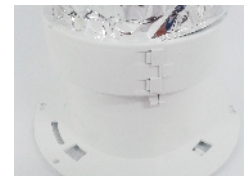

Description and Applications

The CVA air diffusers are specially designed for in-wall or false ceiling installations, offering an efficient way to manage fresh airflow in your space. Crafted from 100% ABS Plastic, these diffusers not only ensure durability but also make for easy installation and maintenance. Unique to the CVA air diffusers is their lock nut feature for secure airflow balancing and an adjustable fit for that final touch. When used with the FixAR System, installation becomes seamless, eliminating the need for studs. Moreover, the exclusive connection system to the duct enhances the diffusers' performance, making them a comprehensive solution for airflow management.

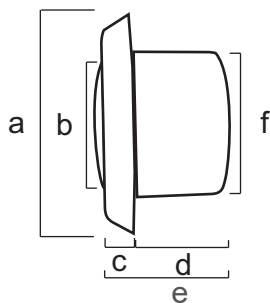

Features x Benefits

FEATURES	BENEFITS
Duct Join System	Exclusive system of Connectflux help the join with the duct, without using tape or other products and guarantee the quality of the join. For 100 and 125 models.
No studs or screw for installation	With FixAR is easy and fast to install the air difuser at the false ceiling.
